CAREER OBJECTIVE

Full-Stack Engineer & IT Specialist with a Computer Science background and a "systems-first" approach to software development. Expert at bridging the gap between high-performance Frontend interfaces (React, Tailwind) and secure Backend architectures (Node.js, REST APIs). Leveraging a professional foundation in IT Operations and Technical Support, I bring a unique ability to diagnose complex system bottlenecks, manage infrastructure reliability, and deliver production-ready code that prioritizes both security and user experience. Proven track record in Agile environments, from engineering e-commerce platforms to architecting administrative workflow engines and automated data systems.

SKILLS

TECHNICAL SKILLS

- Backend Development: Node.js | Express.js | MongoDB | MySQL | PostgreSQL | Zod (Validation)
- Frontend Development: React.js | TypeScript | JavaScript (ES6+) | React Query | Redux | React Router
- Styling & Design: Tailwind CSS | CSS3 | HTML5 | Mobile-First & Responsive Design | UI/UX Implementation
- Testing & Version Control: Jest | React Testing Library | Git | GitHub | Feature-based Branching
- Deployment & Tools: Vercel | Netlify | Postman | Vite | RESTful API Design
- IT & Systems: Hardware/Software Diagnostics | Network Troubleshooting | System Maintenance | Asset Management
- Digital & Creative: SEO (Google Search Console) | Graphic Design | MS Office 365 | WordPress

SOFT SKILLS

- Problem Solving: Analytical Thinking | Technical Troubleshooting | Root Cause Analysis
- Collaboration: Agile Methodologies | Remote Teamwork | Cross-Functional Communication
- Execution: Attention to Detail | Time Management | Multitasking | Adaptability

EXPERIENCE

Fullstack Developer, September 2025 - Current

Blippto, Remote

- Delivered end-to-end features by transforming UI designs into production-ready interfaces and seamlessly integrating them with backend services.
- Architected and maintained RESTful API routes to power core application workflows and ensure efficient data exchange between the client and server.
- Engineered robust data integration layers, connecting frontend applications with backend APIs to ensure consistent system behavior and reliable data flow.
- Implemented automated backend testing, writing and maintaining test suites for API routes to increase system reliability and prevent regressions.
- Collaborated across the full technology stack, ensuring high-quality code standards from the user interface down to the database level.

Backend Developer July 2025 - Current

Solva, Remote

- Engineered administrative control modules for a multi-faceted platform, managing complex data for jobs, innovations, scholarships, and grants.
- Developed secure authentication and authorization for the admin panel, ensuring protected access to sensitive user and financial data.
- Implemented comprehensive CRUD functionality for core platform entities, allowing admins to seamlessly create, edit, and manage projects and questions.
- Built a robust approval workflow engine to process "Cashout Requests" and applications, featuring granular "Approve" and "Reject" logic.
- Optimized backend data management, ensuring that high volumes of scholarship and grant submissions were accurately stored and retrieved.
- Maintained and scaled existing codebase, identifying and resolving bugs while adding new features to an established system architecture.

Admin / IT Support Officer, October 2024 - Current

Xplorerglobal Consulting Limited, Lagos

- Delivered comprehensive IT support, diagnosing and resolving hardware and software issues to ensure uninterrupted business operations.
- Provided first-level technical troubleshooting for staff, reducing downtime and maintaining office productivity.
- Directed the design and production of digital assets, including promotional flyers and corporate ID cards, ensuring consistent brand identity.
- Managed official corporate correspondence, drafting and formatting professional client communications and sensitive documentation.
- Streamlined administrative workflows by accurately managing high-volume online data entry and digital form submissions.
- Coordinated cross-departmental tasks, balancing customer service and administrative support to improve overall office efficiency.

Customer Support, February 2022 - September 2023

Gsubz, Remote

- Resolved high-volume customer inquiries via real-time chat, maintaining a high satisfaction rate through timely and professional technical assistance.
- Guided users through complex account configurations and technical troubleshooting, directly improving the overall user onboarding experience.
- Managed a detailed incident database, documenting customer interactions and technical bugs to streamline the escalation process for the engineering team.
- Optimized the internal knowledge base by authoring FAQ updates and standardized troubleshooting workflows, reducing repetitive support tickets.
- Acted as a bridge between users and the product team, identifying common pain points to help prioritize future feature updates.

Frontend Developer, June 2023 - July 2023

Weventa, Remote

- Created a high-performance e-commerce frontend with dynamic product filtering, allowing users to instantly sort by category, price, and search terms.
- Developed interactive product modules with detailed descriptions and availability tracking, significantly enhancing user engagement and content visibility.
- Developed a secure authentication flow featuring signup, login, and session-based conditional rendering to personalize the user experience.
- Implemented client-side routing using React Router to enable seamless, single-page navigation between the product catalog, cart, and checkout.
- Built a library of reusable UI components using React and Tailwind CSS, ensuring a consistent design system and faster development cycles.
- Optimized application state and performance using React hooks (useState, useEffect), reducing load times and ensuring smooth transitions across mobile and desktop.

Backend Developer, April 2023 - June 2023

NACOS SMP, Remote

- Created a Student Management System designed to streamline departmental coordination, attendance tracking, and automated communication.
- Developed an Administrative Suite featuring Role-Based Access Control (RBAC), sub-admin account management, and secure password recovery flows.
- Built a CSV processing engine for automated attendance tracking, allowing admins to upload bulk student data with instant presence validation.
- Integrated automated email services to trigger real-time notifications for attendance milestones and departmental announcements.
- Developed secure backend logic to ensure data privacy and integrity across different user permission levels.

Backend Developer, January 2023 - February 2023

Ravegen, Remote

- Collaborated on a modular e-commerce architecture, utilizing feature-based branching in Git/GitHub to manage parallel development and clean code integration.
- Engineered a comprehensive order management system, implementing full CRUD functionality based on RESTful API design patterns for high data integrity.
- Architected an automated notification engine, developing backend services to trigger transactional emails for store registrations and post-purchase customer journeys.
- Streamlined developer onboarding by authoring technical documentation and API specifications, significantly improving feature clarity and team velocity.
- Developed a secure 'Contact Us' infrastructure, featuring robust server-side validation and backend logic for processing and storing high-volume inquiries.
- Built marketing-ready subscription logic, designing API routes and integration points for seamless email marketing and lead capture.
- Refactored core user models to support advanced customization, implementing scalable user settings and improving database flexibility.

Backend Developer (Intern), October 2022 - December 2022

HNG Internship, Remote

- Developed the "Certgo" Backend, a robust service that automated CSV parsing, dynamic PDF generation, and automated email distribution.
- Created RESTful APIs for core features, including a "Contact Us" module and secure file upload systems.
- Implemented asynchronous logic and background tasks to handle resource-heavy processes like certificate rendering and mailing.
- Designed scalable backend patterns with a focus on clean data flow, file handling, and API security.
- Executed high-priority tasks in a fast-paced, remote environment, consistently meeting strict weekly production deadlines.

Full stack Developer Volunteer, July 2022 - September 2022

She Code Africa, Remote

- Created a responsive landing page for the She Code Africa Summit 2022, ensuring 100% fidelity to UI/UX design specifications.
- Utilized React.js and Tailwind CSS to build a performance-oriented frontend with maintainable, utility-first styling.
- Translated complex mockups into functional elements, ensuring cross-browser compatibility and responsiveness across all device sizes.
- Collaborated in a remote Agile environment, using Git for version control and participating in code reviews to maintain high code quality.
- Optimized asset loading and accessibility, improving user experience and navigation flow for summit attendees.

IT Support Intern, January 2022 - December 2022

Sunu Health Nigeria, Lagos

- Optimized system uptime by diagnosing and resolving critical hardware and software bottlenecks for a large corporate staff.
- Streamlined employee onboarding by configuring user accounts, secure email clients, and network access protocols.
- Managed IT asset inventory and documentation, implementing tracking procedures to ensure hardware accountability and resource availability.
- Maintained network stability by proactively troubleshooting connectivity issues and monitoring application performance.
- Facilitated system-wide upgrades and software deployments to improve overall infrastructure reliability and security.

EDUCATION

January 2019 - September 2023

Bachelor of Science, Computer Science, University of Benin

CERTIFICATION AND TRAINING

FreeCodeCamp
