CAREER OBJECTIVE

A dedicated and proactive Computer Science graduate seeking a dynamic role where I can apply my technical skills, problem-solving abilities, and IT expertise. I am a strong team player with a keen eye for detail, professionalism, and a creative approach to troubleshooting and optimizing technical processes. My goal is to build a career in a professional setting where I can leverage my analytical, technical, and customer support skills to contribute to organizational success while fostering personal and professional growth.

EXPERIENCE

Admin / IT Support Officer, October 2024 - Current

Xplorerglobal Consulting Limited, Lagos

- Draft and format official letters for clients.
- Provided first-level troubleshooting for staff
- Design graphic materials, including flyers and promotional content.
- Create and manage ID cards for staff and clients.
- Delivered IT support services, diagnosing and resolving hardware/software issues
- Complete and submit online forms accurately and efficiently.
- Assist in administrative and customer service tasks to support business operations.

Customer Support, February 2022 - September 2023

Gsubz, Remote

- Provided timely and professional support, resolving customer inquiries via chat.
- Assisted customers with account setup, troubleshooting to enhance user experience.
- Maintained detailed records of customer interactions and escalated complex cases when necessary.
- Helped optimize the knowledge base by contributing to FAQ updates and common troubleshooting workflows.

Frontend Developer, June 2023 - July 2023

Weventa, Remote

- Built a dynamic and responsive ecommerce platform frontend, enabling users to browse, search, and filter products by category, name, and pricing.
- Developed product detail pages displaying images, descriptions, pricing, and availability, enhancing product visibility and user engagement.
- Designed and implemented user authentication interfaces with signup, login, logout, and conditional rendering based on user session.
- Utilized React Router to manage seamless navigation between product pages, cart, checkout, and account sections.
- Applied TailwindCSS utility classes to deliver a modern, responsive design optimized for mobile and desktop experiences.
- Focused on component reusability, state management via useState and useEffect, and performance optimization for fast load times and smooth user experience.

Backend Developer, April 2023 - June 2023

NACOS SMP, Remote

- Contributed to the design and development of a student management system tailored for departmental coordination, attendance tracking, and communication.
- Developed super admin features including: Creation of sub-admin accounts, Secure password reset and recovery flow and Admin role-based access control.
- Built a CSV attendance processing system, enabling file upload and student presence tracking.
- Integrated automated email functionality to notify students of attendance records or announcements.

Backend Developer, January 2023 - February 2023

Ravegen, Remote

- Collaborated on a modular e-commerce system using feature-based branching with Git and GitHub.
- Created technical documentation to improve developer onboarding and feature clarity.
- Implemented full CRUD functionality for the order system using RESTful API design patterns.
- Developed backend service for automated transactional emails triggered on store registration events.
- Handled post-purchase user communication by integrating dynamic email templates
- Created a Contact Us endpoint with validation and backend logic to store and process inquiries.
- Built subscription form logic and API routes for email marketing integrations.
- Refactored the user model and added customizable user settings

Backend Developer (Intern), October 2022 - December 2022

HNG Internship, Remote

- Participated in a fast-paced remote internship focused on solving real-world backend engineering problems through weekly tasks and project-based evaluations.
- Completed multiple backend challenges including REST API design, file uploads, and email automation.
- Worked with a group that built a Certificate Generator API that parses uploaded CSV files containing recipient data, dynamically generates PDF certificates and sends certificates via email.
- Helped in developing certgo, a robust backend service tailored for certificate distribution system.
- Designed and implemented a Contact Us API.
- Gained hands-on experience with backend design patterns, file handling, and asynchronous logic.

Full stack Developer Volunteer, July 2022 - September 2022

She Code Africa, Remote

- Contributed to developing the She Code Africa Summit 2022 website.
- Designed and implemented responsive user interfaces using React.js and TailwindCSS.
- Collaborated with a team of developers to ensure seamless frontend performance.
- Optimized website components for better accessibility and user experience.
- Worked closely with designers to translate UI/UX designs into functional web pages.
- Used Git for version control and actively participated in code reviews to maintain code quality and team alignment.

IT Support Intern, January 2022 - December 2022

Sunu Health Nigeria, Lagos

- Provided technical support by diagnosing and resolving hardware and software issues.
- Assisted in IT asset management, ensuring accurate inventory tracking and documentation.
- Monitored and maintained system performance, troubleshooting network and application issues.
- Managed and tracked reported IT incidents for efficient resolution.
- Supported team members in system upgrades and software installations to improve operational efficiency.
- Diagnosed and resolved both hardware and software issues for staff, reducing downtime and improving operational efficiency.
- Provided staff onboarding support by setting up user accounts, email clients, and secure access protocols.

EDUCATION

January 2019 - September 2023

Bachelor of Science, Computer Science, University of Benin
